

ZERO TRUST. CONTINUOUS VALIDATION. REUSE EVERYWHERE.

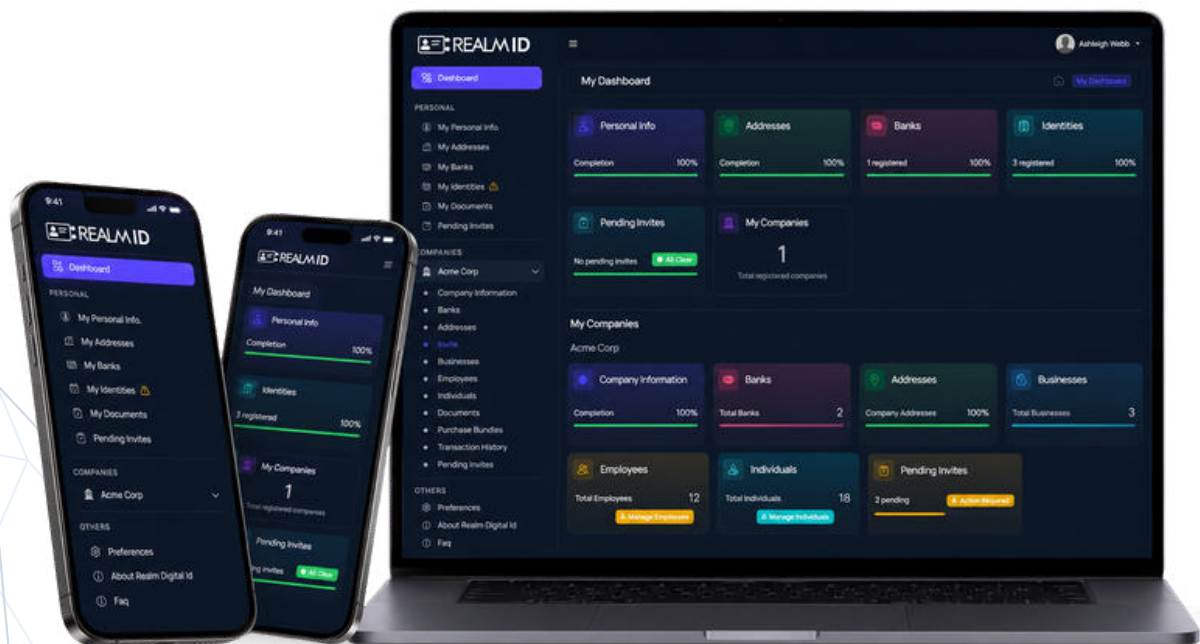

The reusable trust layer for modern business processes.

Businesses don't just manage data.
They manage trusted relationships.

Realm ID enables organisations to establish, continuously validate and securely reuse trusted digital relationships across every business process.

Build trust into every process

BUSINESS DOESN'T HAVE AN IDENTITY PROBLEM. IT HAS A TRUST PROBLEM.

Every day, organisations collect, verify and store the same information across multiple systems.

Suppliers repeatedly provide banking details.

Customers complete the same forms.

Employees submit the same documents.

Meanwhile, AI-powered fraud, impersonation attacks and increasingly sophisticated cyber threats make it harder than ever to know who-or what-you can trust.

THE RESULT IS:

Slower onboarding

Duplicate data

Payment fraud

Manual compliance processes

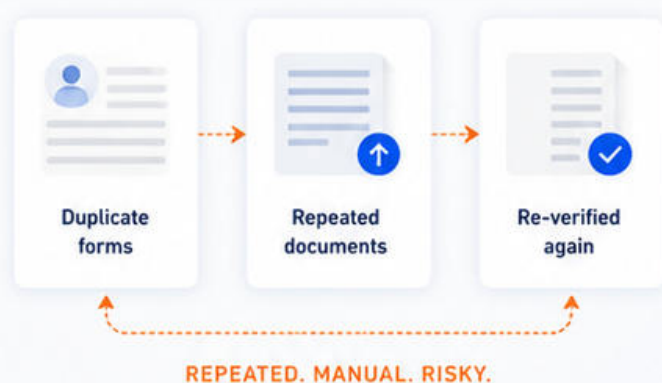

Poor customer experiences

Higher operational costs

Increased business risk

As artificial intelligence makes fraud more sophisticated, trust can no longer be treated as a once-off event.

It must become reusable.

TRUST SHOULDN'T START FROM ZERO EVERY TIME.

Every transaction shouldn't require another identity check.

Every onboarding shouldn't require another set of documents.

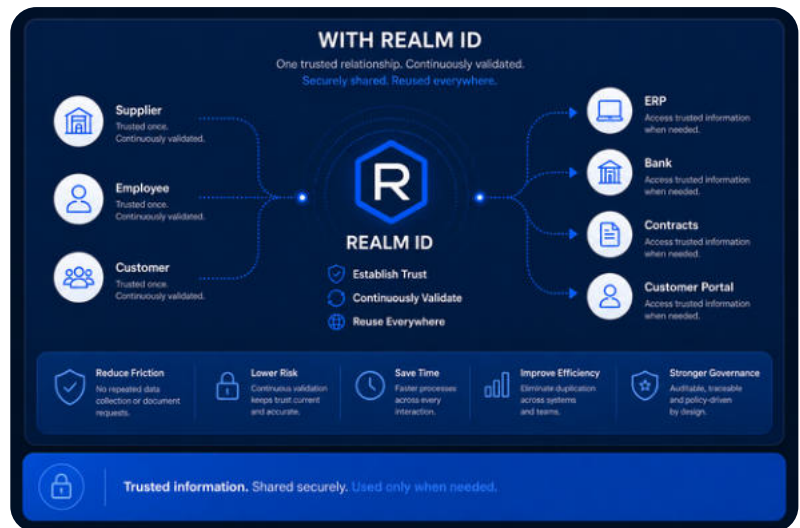

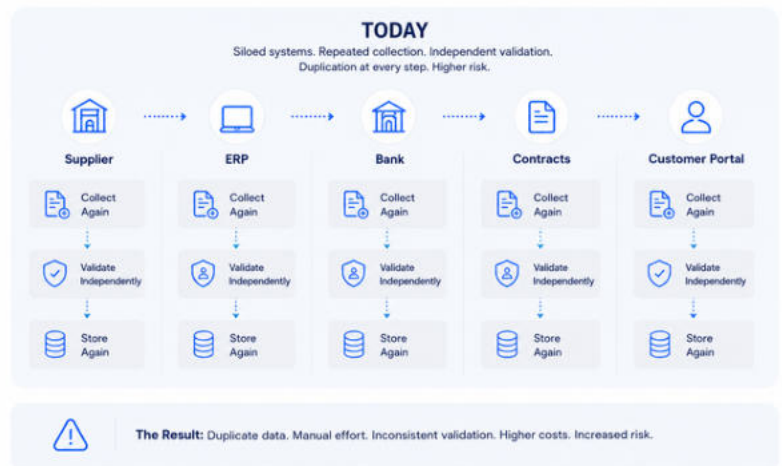

Every payment shouldn't depend on manually verified information.

Realm ID creates reusable trust.

By establishing a trusted digital identity, organisations can securely reuse verified information across multiple systems, transactions and business processes.

Instead of repeatedly collecting and manually validating the same information, businesses gain access to trusted, reusable digital relationships that reduce friction while improving governance.

LESS FRICTION

Eliminate repetitive data collection and speed up every process.

MORE TRUST

Ensure information is verified once and trusted across every interaction.

GREATER EFFICIENCY

Reduce cost, manual work and complexity across your organisation.

STRONGER GOVERNANCE

Maintain visibility, control and auditability across all business processes.

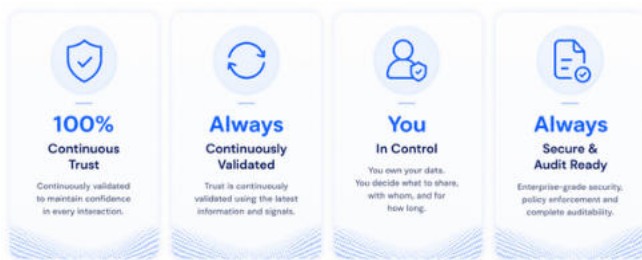

Realm ID turns trust into a reusable asset—powering faster onboarding, secure transactions and stronger business relationships at scale.

THE TRUST LAYER FOR MODERN BUSINESS

Realm ID is a reusable trust platform that integrates seamlessly into your existing systems and workflows.

Rather than replacing your ERP, CRM or business applications, Realm ID enhances them by bringing trusted identity directly into your processes.

Trust becomes embedded into every interaction-helping you move faster, reduce risk and build stronger relationships across your business ecosystem.

Trusted Digital Identities

Create verified identities for individuals and organisations with confidence.

Reusable by Design

Reuse verified information across multiple systems, transactions and business processes.

Reduce Fraud

Multi-layered verification and continuous validation help protect against identity fraud and impersonation.

Embedded Digital Signatures

Legally binding eSignatures integrated into your workflows for approvals, contracts and agreements.

Strengthen Governance

Digital audit trails, permissions and approvals ensure accountability and regulatory compliance.

Designed to Scale

Built for enterprise scale-supporting millions of trusted interactions across your organisation and partners.

Realm ID doesn't replace your systems. It brings trusted identity into the heart of your business.

BUILD TRUSTED COMMERCIAL RELATIONSHIPS

Realm ID helps organisations create, maintain and reuse trusted relationships with customers, suppliers, employees and partners.

Instead of managing disconnected records and repeated verification across multiple systems, you gain access to trusted, up-to-date information that is securely validated and ready to use.

REAL IMPACT. MEASURABLE RESULTS.

Results based on organizations using reusable trust across multiple business processes.

BUSINESS OUTCOMES:

Faster Onboarding

Onboard suppliers, customers and employees up to 70% faster with trusted information ready to use.

Payment Confidence

Validate banking and account details continuously to reduce payment risk and failed transactions.

Reduced Fraud Exposure

Multi-layered verification and continuous validation help stop impersonation, identity fraud and payment fraud.

Reusable KYC & KYB Information

Capture once, continuously validate and securely reuse trusted information across all systems and processes.

Improved Compliance & Governance

Meet regulatory requirements with auditable records, approvals and policy enforcement.

Better Experiences

Frictionless, secure interactions build stronger relationships and increase satisfaction.

Reduced Administrative Effort

Eliminate duplicate data entry, document requests and manual verification.

More Efficient Processes

Streamline onboarding, payments, contracts and compliance across your organisation.

Stronger Audit Trails

Every action is recorded, traceable and securely stored.

Increased Operational Confidence

Make decisions with trusted, accurate and up-to-date information.

TRUST BECOMES A REUSABLE BUSINESS ASSET.

Capture once. Verify once. Reuse across every process.
Stronger relationships. Lower risk. Greater value.

YOUR IDENTITY, YOUR CONTROL

Realm ID is built around sovereign identity principles.

Individuals and organisations remain in control of their own information and decide exactly what is shared, with whom and for how long.

Instead of repeatedly submitting documents and completing forms, users maintain a secure digital identity that can be reused whenever required.

**You stay in control.
We protect your trust.**

You decide what information is shared and with whom.

You grant permission for specific purposes and durations.

You can revoke access at any time.

**Your information. Your permissions.
Your control.**

HOW REALM EMPOWERS USERS

Secure by Design

Your information is protected with enterprise-grade security and encryption.

User-Owned Identity

You own your identity. We never sell or share your data.

Selective Sharing

Share only the information required for a specific process—nothing more.

Time-Bound Permissions

Set how long access is valid and automatically expire when it's no longer needed.

Transparency

See who has accessed your information, when and for what purpose.

Secure Document Management

Your supporting documents are stored securely and linked to your identity.

Auditable by Default

Every action is logged to ensure accountability and build confidence.

LESS FRICTION FOR USERS. MORE TRUST FOR ORGANISATIONS.

Create Your ID

Create your Realm ID in minutes.

Verify Once

Verify your information securely and only once.

Store Securely

Your information is stored securely and privately.

Share With Control

Share only what's needed, with clear permissions.

Complete The Process

Business processes are completed faster and more securely.

Reuse Next Time

Your trusted identity can be reused across multiple interactions.

For users, Realm ID means less friction and more privacy.

For organisations, it means higher trust and stronger relationships.

AI IS CHANGING IDENTITY FOREVER

Artificial intelligence has dramatically increased the sophistication of impersonation attacks, document fraud and digital deception.

Traditional approaches that rely on static documents or isolated verification events are no longer enough.

Organisations need trust that can persist beyond a single transaction.

Realm ID combines reusable digital identity, secure information sharing and embedded digital signatures to create trusted interactions across every business process.

Whether onboarding a supplier, validating banking information, approving a payment or signing a contract, Realm ID ensures that trust becomes an integrated part of the workflow-not an afterthought.

THE NEW REALITY

AI enables more sophisticated identity threats.

AI-generated
impersonation

Deepfake
documents

Automated
account takeover

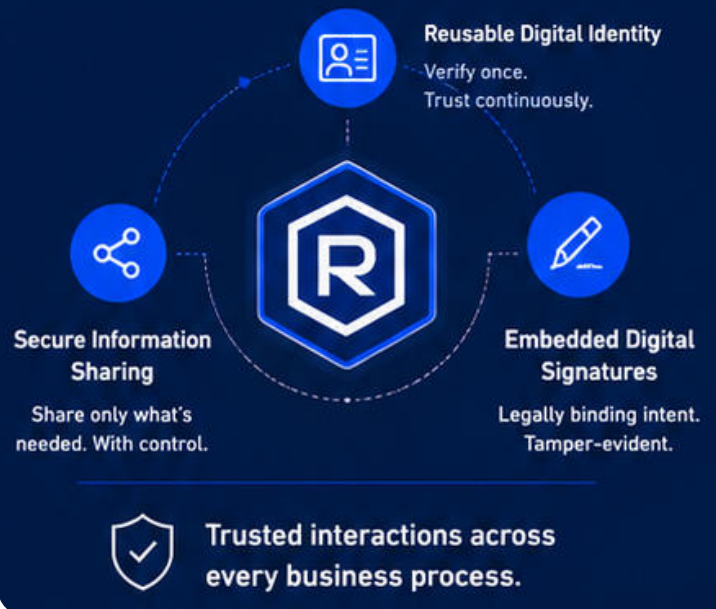

Synthetic
identities

Static verification and point-in-time checks can't keep up with evolving threats.

THE REALM ID DIFFERENCE

**ONBOARD
WITH CONFIDENCE**

Verify identities and businesses once and onboard faster with less friction.

**TRANSACTION
WITH ASSURANCE**

Validate banking and payment details to prevent fraud and reduce risk.

**AGREE
WITH CERTAINTY**

Digitally sign contracts and approvals with legally binding eSignatures.

**COMPLY
WITH CONFIDENCE**

Maintain audit-ready records and meet regulatory obligations with ease.

**OPERATE
WITH TRUST**

Build lasting, trusted relationships across your entire business ecosystem.

In the age of AI, trust can't be assumed.
It must be established, protected and reused.

Realm ID is the trust layer
beneath every trusted business process.
